Full-Stack Web developer(Python)   *Sept.2022-in progress*
Graduation
B.Tech in Chemical Engg.   *2018 – 2022*

PROJECTS

- **Portfolio Website** (github)(website)   HTML,CSS,JavaScript,JQuery
  I have created this website to showcase the different projects I have done while learning web development.
- **Restaurant Webpage** (Github)   HTML,CSS,Bootstrap,JavaScript
  It's a Project that enabled me to get well versed with the CSS-layout i.e.Box Model,etc
- **Landing Page** (GitHub)   HTML,CSS,JavaScript
  One of the very first projects I did and was able to learn things such as toggle button for dark/light theme, scroll up button, a bit of responsive web design.
- **Discover India -A Travel Vlog** (GitHub)   HTML,CSS,JS,JQuery
- **Password Generator** (GitHub)   JavaScript
- **Game of Cards** (GitHub)   JavaScript
- **Text-Adventure Game** (GitHub)   Python
  It's a Game build with the help of a couple of module, and it helped me understand the concept of classes in python,inheritance,etc
- **Memory Game** (GitHub)   Python
  Used the modules turtle and random to create a nice memory game in python.
- **GitHub Repository for the rest of my projects** (Link)
